Clinical Trial Recruitment

Clinical trial recruitment- Continue to recruit for two NIH studies Clozapine trial and BICEPS study and a PCORI trial.

We are seeking to make Yoga Based Interventions more inclusive and accessible. We are recruiting teens (12-18), specifically, boys (any race/ethnicity), and Black and Asian-American teens (any gender) who are currently experiencing stress or sad mood to get their thoughts on Yoga and Group CBT. They will be interviewed (virtually) for no more than 2 hours and will be compensated \$50 for their time.

The CfSC currently has two active trials. (1) The **Stimulation During Sleep** pilot study has enrolled 68 participants, with 26 having completed the study so far, and we are actively recruiting individuals with schizophrenia. (2) The **Sleep and Emotions** study, supported by K23 funding, has enrolled 118 participants, with 23 having completed the study to date, and we are actively recruiting healthy control participants and individuals with insomnia disorder.
